

## Catholic Biology Kit-Canada

The Biology Kit shipping to Canadian customers is identical to the US kit **except** that it **does not have** the following preserved specimens:

- Earthworm dissection specimen, 8-10”
- Grass frog dissection specimen, 3-4”
- Large lubber grasshopper dissection specimen

The Canadian kit **DOES** supply:

- Advanced dissection tools
- Styrofoam dissection tray
- Earthworm dissection guide
- Grasshopper dissection guide
- Frog dissection guide

**Canadian customers have two options.**

1. You can purchase a kit in the U.S. and make your own arrangements to bring it into Canada
2. Purchase the three preserved specimens in Canada (the earthworm, grass frog and grasshopper) in order to complete the kit. You may purchase them anywhere you wish, but some possible sources are listed below.

### Possible Sources for Preserved Specimens:

1. [Merlan Canada](#) (A division of Carolina Science; SKU Code 221021)
2. [Learning House Canada/BJU](#) (Product Code 033076 contains just specimens, but no grasshopper. Your teacher may allow you to replace dissection of the grasshopper with dissection of the crayfish.)
3. [Canadian Home Education Resources](#) (Product Code AMKTSMDISS contains just specimens, but no grasshopper. Your teacher may allow you to replace dissection of the grasshopper with dissection of the crayfish.)
4. [Amazon Canada](#) (This kit contains more than you need)
5. **Wards Boreal Science/Canada:** For those who wish to work together as a group and to save money, Boreal Science offers the following specimens.
  - a. [Earthworms](#): Set of 10 for \$12.30
  - b. [Lubber Grasshopper](#): Jar of 10 for \$9.59
  - c. [Frog](#): Pack of 1 for \$13.69

**If you find a better source, please share with me at [dralloy@catholictexts.com](mailto:dralloy@catholictexts.com) so that I may inform other Canadian customers. Thanks and God bless you!**
